

Long-Lasting Style the American Way

with MetroVac® Air Force® Pet Dryers!

Since 1985, MetroVac has been a leading supplier of the world's most powerful and longest lasting pet dryers. Packed with so much power, the innovatively-designed Air Force® pet dryers cut drying time as much as 75%. Just flip the switch and these high-speed dryers literally "blast" water off the wettest dogs, faster and more efficiently than all other pet dryers. And, our dryers are backed by the strongest warranty in the industry because we stand behind our product quality.

The MetroVac Air Force dryers are safer to use than traditional hairdryers and more efficient than towel drying. They have no heating element to burn the dog's skin, while drying even the thickest coat.

Powerful. Fast. Affordable.

NOW AVAILABLE IN VARIABLE CONTROL!

Introducing the new Variable Control Air Force[®] Pet Dryers

Groomers worldwide have loved our pet dryers for over 30 years. Due to customer demand, MetroVac is proud to introduce new variable control models. These enhancements allow groomers to have infinite control to dry ALL dogs big and small; long and short haired.

For even greater versatility and blowing power, the new Master Blaster features two motors, two separate switches and DUAL variable controls. These features reduce unnecessary noise when grooming smaller, short haired breeds. Less noise means less frightened dogs and more efficient grooming.

Air Force Master Blaster® and Blaster®
